Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Respond to Amendment

1. This office action is in response to the amendment file on 5/21/07.
 - Claims 1-24 have been cancelled.
 - Claims 25-42 are newly added.
 - Claims 25-42 are pending in the application.
- After further review of the claims invention, a new restriction requirement is needed.

Examiner regrets any inconveniences, which may have been caused by this action. A new restriction requirement is as follows.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 25-32, 34-42, drawn to dynamic nonvolatile random access memory device, classified in class 365, subclass 185.21+.
 - II. Claim 33, drawn to method of fabricating an NVRAM, classified in class 438, subclass 257.
- I. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as a product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be

Art Unit: 2827

used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the Group I invention would not necessarily imply unpatentability of the Group II invention, since the device of Group I could be made by a processes different from those of the Group II. For example, subsequently carrying out ion implantation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
